CUSTOMER SATISFACTION

THE SUCCESS of the McKay Nursery Company and of McKay representatives is based on the soundness of this formula which has been proved over a period of more than a third of a century.

All prices quoted herein are for first class stock of the grades specified, well packed and delivered in good condition, charges paid.

Six sell at the dozen rates, fifty at the hundred rates unless otherwise specified.

McKay representatives are urged to help spread the sound gospel that "nursery stock which doesn't grow is expensive at any price" and to maintain the quality and helpfulness of their personal contact service at all times on a par with the quality of McKay offerings.

WE are careful to have all stock correctly labeled, and the McKay Nursery Company will replace on satisfactory proof all stock that may prove untrue to the description under which it is sold, or, at its option, may refund the amount paid therefor; but in no case shall they be liable for any sum greater than the amount originally received for said stock.

*“What a whale of a difference
a few cents make!”*

Here you will see an actual photograph of a McKay standard size (5-6 ft.) fruit tree, also a photograph of a typical fruit tree put out by the average mail order concern. Make your own comparison. Note the sturdy trunk, the well developed top and the heavy root system — all characteristic of McKay trees. Then look at the inferior type. You're bound to conclude that the best is the cheapest when it comes to buying stock. Why buy small, poorly developed stock when you can get McKay quality at the low prices contained in this Price List. Remember that nursery stock which doesn't grow is expensive at any price. The small amount you pay for vigorous, well developed stock is soon forgotten when it brings you a hundred-fold return on your investment.

McKAY SHADE AND ORNAMENTAL TREES

To avoid any misunderstanding regarding sizes and grades of trees we make the following explanation: The 6-8 ft. grade takes in trees which are 6 ft. and over and up to 8 ft., but does not include the 8 ft. trees. For illustration: In case the planter desires an 8 ft. tree it will be necessary to purchase the 8-10 ft. size. This also applies to trees sold by caliper. The size of trees sold by diameter is measured six inches above the roots.

THE FAMOUS WASHINGTON ELM

Our trees are direct descendants of the Famous Washington Elm under whose spreading branches, General Washington took command of the first American Army.

EVERY SCHOOL, PARK AND CEMETERY SHOULD HAVE AT LEAST ONE OF THESE TREES PLANTED ON ITS GROUNDS.

Each tree is numbered and accompanied by a "certificate of genuineness" signed by the President of the McKay Nursery Company.

McKAY EVERGREENS

All nursery grown, bushy, transplanted stock.

We find that many purchasers do not handle Evergreens properly for successful results. Therefore, we do not make any free replacement on this class of stock. Replacements will be made at one-half ($\frac{1}{2}$) our regular retail price.

The following are for hedges and windbreaks. They are dug without a ball of dirt and the roots are carefully wrapped in wet packing material.

COMPARE THIS SHRUBBERY AND BE YOUR OWN JUDGE

The shrubbery shown on the right will bring the results desired, the results you have a right to expect. Compare this with the light, poorly branched shrub which is so typical of that put out by the average jobber or mail order concern. McKay shrubbery is all two and three years old, bushy, well developed stock, because the McKay Nursery Company is interested in winning your patronage year after year. "What a whale of a difference just a few cents make!"

IF YOU WANT A BEAUTIFUL HEDGE, PLANT
McKAY HEDGING SHRUBS

Privet

Barberry

The above picture shows a comparison between McKay's Privet and Barberry hedging plants and those put out by the average mail order house and department store. The heavily branched, well rooted, transplanted stock furnished McKay customers is so far superior to the spindly, poorly rooted specimens shown beside them that you will readily realize this stock is expensive at any price, especially so, when you can buy McKay Quality Stock at the prices in this price list. Hedging material such as we supply quickly makes a fine, full hedge instead of the thin open type.

McKAY ROSES

Our Roses are strong two year plants, grown out of doors, well rooted, hardy, first-class, and are more valuable than plants sent out by many mail order houses or sold by department stores at cheap prices. Often these are mere tender shoots, started in a greenhouse and are without strength enough to stand the shock of transplanting. Our Roses usually bloom the first season.

The letter after each name indicates the color according to the following key: (B) for Blush; (C) for Crimson; (P) for Pink; (R) for Red; (S) for Silver; (W) for White; (Y) for Yellow; (OR) for Orange Red.

NURSERY STOCK THAT DOESN'T GROW IS EXPENSIVE AT ANY PRICE

The rose at the right is good illustration of the strong, healthy, field grown stock that McKay Nursery Company furnishes its customers. Compare it with the one on the left which is typical of the kind of stock handled by the average mail order house and department store. This comparison will convince you that the best is the cheapest. Nursery stock that doesn't grow is expensive at any price. It is evident McKay roses invariably bloom the first year.

When You Buy On PRICE Alone

You Can Never Be Sure!

● It's unwise to pay too much, but it is worse to pay too little. When you pay too much you lose a little money — that's all; but when you pay too little you sometimes lose everything because the thing you bought is incapable of doing the thing it was bought to do. ● The common law of business balance prohibits paying a little and getting a lot. It can't be done. If you deal with the lowest bidder, it is well to add something for the risk you run, and if you do that, you have enough to **BUY QUALITY.**

THEY ARE WORTH SEEING!

OUR GUARANTEE

When stock is received and paid for on day of delivery, at full retail price, we guarantee, providing reasonable care is given by the purchaser, to replace entirely free of charge all nursery stock which fails to grow, providing we are notified before August 1st, following delivery, excepting Evergreen Trees, which will be replaced at one-half ($\frac{1}{2}$) our regular price.
